

QUARTERLY ACTIVITIES REPORT

September 2021

22 October 2021

GME Resources Limited (“**GME**” or “**the Company**”) provides an update on its activities completed during the September 2021 quarter.

Highlights

- **Renounceable Rights Issue raises \$1.67m (refer ASX announcement on the 13 July 2021)**
- **Applications for Work Permits lodged with DMIRS for further drilling programs at Abednego and Fairfield Gold prospects.**

Capital Raising

In July the company launched a 1:15 Renounceable Rights Issue at 4.5 cents to raise \$1.67 million dollars. The issue was well supported with 83% of shareholders taking up their rights. The shortfall of 6,837,955 shares was subsequently placed. Following the allotment of new shares, the Company has 593,990,762 fully paid ordinary shares on issue.

Funds from the issue will be used for ongoing tenement maintenance and statutory expenditures, exploration and evaluation activity incorporating ongoing discussions with potential strategic partner/offtake parties on development options for the NiWest Nickel-Cobalt Project, infill drilling programs and exploration at the Fairfield and Abednego gold prospects, and for administrative and general working capital purposes.

Future Work Programs

The Company has made application to DMIRS for work programs at the Fairfield Gold prospect and the Abednego Gold Project. Further exploration is currently being planned.

Company Flagship (100%) - NiWest Nickel Cobalt Project

The NiWest Nickel Cobalt Project hosts one of the highest-grade undeveloped nickel laterite resources in Australia estimated to contain 81 million tonnes averaging 1.03% Nickel and 0.06% Cobalt. (Refer ASX announcement NiWest Resource Update 21 Feb 2017, refer Appendix 2 and 3, Tables 2 - 4). Over 75% of the resource falls within the Indicated and Measured categories.

The NiWest Nickel Cobalt Project, is at an advanced stage, having completed high level Mineral Resource estimates and developed a technically viable process flow sheet. An extensive Pre-Feasibility Study (PFS) has been completed demonstrating that a robust economic outcome is achievable at similar commodity prices we are witnessing today. The PFS highlights the NiWest

Nickel Cobalt Project as a significant 20 plus year operation that is strongly leveraged to long term nickel price growth. The Company remains ready and committed to advance the project as soon as investment conditions are favourable. The Company continues to explore alternate novel techniques that have potential to enhance the designed flow sheet and improve environmental aspects of the development.

In the meantime, the Company has reduced expenditure requirements through long term tenement exemptions to preserve cash outflows whilst discussions with interested party's progress.

Expenditure this quarter

In accordance with the reporting requirements of ASX Listing Rule 5.3 the Company spent \$121,000 on exploration and evaluation activities during the quarter. There was no mining development or production activities conducted during the quarter.

Expenditure predominantly related to:

- Exploration Drilling at the Federation Gold Prospect.
- Technical consulting services;
- General fieldwork including rehabilitation;
- Regulatory rents, rates and associated tenement administration holding costs..

In addition, during the current quarter the Company made payments to related parties of \$60,712 being Directors Remuneration.
